

Direct Demand Portal

Team guide — every page, every button, who can use it

A walkthrough of the lead CRM used by the Openhouse Direct Demand team: how a lead travels from a Meta ad to a booked site visit, what each screen does, what every control changes, and exactly what an Admin can do that an RM cannot.

This edition documents **only what exists in the `staging` branch**. Every screenshot was taken from the staging code running against a sample database — no production data appears anywhere in this document.

How to read this guide

Each screen gets a screenshot, why it exists, **who can use it**, a table of its controls, and the things that are not obvious from looking at it. Role chips: **ADMIN** **RM** **TEST RM** **NO ACCESS**. Section tags: **NEW** the screen does not exist on main · **CHANGED** it exists on main but works differently in staging.

0. What staging changes

Staging is one commit ahead of main (399586f , 102 files). It is mostly a redesign of how people *move through* the app, plus one new stage and one new permission that matters a lot. If you already know main, this page is everything you need.

Area	In staging
Home NEW	Replaces Dashboard. A Summary view (lead funnel, trends, source and city) and a Table view (the whole lead book with clickable stage boxes), switched by a toggle that is remembered per browser.
Lead popup NEW	Clicking a lead opens it in a popup over the list instead of a new page. <code>/leads/<id></code> still works as a full page for pasted links and new tabs.
Status picker NEW	A dropdown in the popup that sets a lead to any stage, in either direction, instantly. Available to every role . It is the only way to reach Won or Future Prospect.
Future Prospect NEW	A tenth stage for a buyer who isn't buying now but is worth coming back to. Shown on the Rejected page with its own badge.
Lead popup cards CHANGED	New: From the Meta form (every question the ad asked) and Lead history (every logged event). Removed: the WhatsApp button and card, and the inventory / supply match panels.
Worklists CHANGED	The Connected? Yes / No column is gone from New Leads and the callback pages. Marking a call result now happens on Live Calls , or by opening the lead.
List toolbar NEW	Every list has city tabs (including Invalid City), a search box, a Filters modal with removable chips, shared filters (Society, Created, Assigned, Meta form, Invalid number), a Select mode and 50-row paging.
Sidebar CHANGED	Live Calls, WhatsApp and Bonvoice Call Log moved <i>into</i> the sidebar; Meta Leads added; Settings & Access is now admin-only ; the user chip opens your Profile.
Top bar CHANGED	Global search, Reminders, Add New Lead, the WhatsApp button and the incoming-call bell are gone. It now holds the page title, that page's own buttons, and a notification bell .
Profile & dark mode NEW	A Profile page with a Light / Dark switch and Sign out.
Auto-assignment NEW	Every hour, unassigned leads are handed out to RMs one at a time, balanced by how many each RM has already been given <i>today</i> . City-aware — but there is no screen to set an RM's cities yet.
Removed	AI performance summaries, and the admin RM-performance table on the dashboard (use Reports).
Unchanged SAME	Auto-dialer logic, Live Calls and Bonvoice back end, Reports, sign-in and role checks. Those pages only changed cosmetically.

The one change to understand before anything else

On main, stages could only move *forward* — nothing an RM did could walk a lead back down the funnel. In staging, the **Status picker** lets anyone set any stage, backwards included, with no confirmation and no reason recorded. It is logged in Lead history, but it is not guarded. Treat it with care.

1. How the product works

The Direct Demand team sells homes Openhouse has acquired or listed. This portal is where a buyer enquiry becomes a booked site visit. Leads arrive automatically; an RM's job is to call them, qualify them, and book them.

Where leads come from

Source	How it arrives
Meta lead ads	Delivered by Meta's webhook within seconds of the form being submitted. Every question the buyer answered is kept and shown on the lead.
Portals & Meta sheet	99acres, MagicBricks and the Meta sheet are read from Google Sheets on a schedule. An admin can also press Sync now .
WhatsApp	A customer messages the business number; someone converts the chat into a lead.
Huvo AI calls	The bot's calls land in the Huvo Call Log; unlinked numbers can be turned into leads.

The same buyer arriving by two routes is one lead — a lead's identity is its phone number.

An RM's day

1. **Check the bell and Home.** The bell counts new leads and callbacks due today. Home → Summary shows your funnel.
2. **Work the lists.** New Leads, then Call Not Received and Call Back Again. Click a row to open the lead.
3. **Call.** The phone button rings **your own mobile first**; the buyer is bridged in once you pick up. Neither side sees the other's real number.
4. **Qualify on the call.** The popup's form captures purpose, budget, configuration and localities. **Confirm & qualify** moves the lead to Qualified.
5. **Book the visit.** Plan a route across several properties, then book on the Openhouse app. Only a real booking moves the lead to Visited.
6. **During a campaign,** keep **Live Calls** open: it tells you who is on the line and asks you to mark each call.

The rule that explains most of the app

A lead's **stage** decides which page it appears on, and every page is a plain check on it. So a lead is on **exactly one page** — never two, never none. If you cannot find a lead, look at its stage.

Calling hours

Calling hours are **10:00–19:00 IST**. When the app schedules a callback automatically after a missed call, it pushes the time into that window. A time someone types in by hand is never adjusted.

Who gets a new lead

Unassigned leads are handed out **every hour**, one at a time, to active RMs. Whoever has been given the fewest leads **today** gets the next one — counting leads assigned by any means, including by hand earlier in the day. Test RMs and admins are never picked. The sweep can route by city, but no screen sets an RM's cities yet, so today every lead goes to the whole pool.

2. Roles & access

Three roles. Everything is gated by the question “is this person an RM?” — and anyone who is not an RM is treated as an unrestricted admin.

Role	What it means
ADMIN	Sees every lead, call and conversation. Runs dialer campaigns, reads Reports and Activity Logs, manages users. Not dialled by campaigns and not a row in Reports.
RM	Relationship Manager. Lists and counts show only their own leads — plus any lead they are the accompanying RM on for a booked visit.
TEST RM	A real RM account for dry runs, with a real handset. Same as an RM except: badged TEST , never given a WhatsApp conversation, and never picked by the hourly auto-assignment.

Leads are matched to people by NAME

An RM's leads are those whose owner matches their **full name or first name**. A user whose profile has a blank name sees no leads at all — the usual cause of “the app is empty for me”. Two people with the same first name can also collide when leads are reassigned.

RM scoping covers the LISTS, not the lead itself

Lists and counts are filtered to your own leads. But opening a lead by link, and every action inside the popup — Status, assign, reject, qualify, notes — is available to any signed-in user for any lead. Scoping keeps other people's leads out of your way; it is not a lock.

Who can open what

Screen	Admin	RM	Test RM
Home, all lead lists	Every lead	Own leads	Own leads
Lead popup · Status picker	Full	Full — any lead, any stage	Full

Manish Mehta	+91 98107 76510	Meta	Gurgaon	---	₹75 lacs - ₹1 Cr	Within 30 days	08 Sept 2026
Rajesh Mittal	+91 98110 17727	MagicBricks	Gurgaon	DLF The Crest	₹1.5 Cr - ₹2.5 Cr	Just starting	08 Sept 2026
Vishal Agarwal	+91 98156 18827	Stencils	Ghaziabad	Gaur Cascades	Up to ₹75 lacs	3-6 months	08 Sept 2026

Admin: the Admin section lists Auto Dialer, Huvo, Meta Leads, Reports, Activity Logs and Settings.

LEAD	PHONE	SOURCE	CITY	SOCIETY (FROM SOURCE)	BUDGET	PLAN TO BUY	CREATED ON
Gaurav Goel	+91 98128 19012	MagicBricks	Noida	Eldora Utopia	₹1.5 Cr - ₹2.5 Cr	3-6 months	12 Sept 2026
Gaurav Mahotra	+91 98184 90584	Meta	Noida	---	₹1.5 Cr - ₹2.5 Cr	Just starting	11 Sept 2026
Kiran Mahotra	+91 98121 25475	Stencils	Noida	ATS Picturesque	₹1 Cr - ₹1.5 Cr	3-6 months	29 Aug 2026
Sneha Mehta	+91 98205 02727	Meta	Ghaziabad	Gaur Cascades	Up to ₹75 lacs	Within 30 days	29 Aug 2026

The same page as an RM: Live Calls and WhatsApp appear, the admin entries are gone, and counts are their own.

Getting and keeping access

1. An admin adds you in **Settings & Access**. Nobody else can sign in.
2. Sign in with your **@openhouse.in** Google account.
3. A session lasts **7 days**. Your role and active status are re-checked about **every 30 seconds**, so an admin's change applies almost at once.
4. **Sign out** on Profile ends the session in *this browser only*. To end every session, an admin uses **Force logout all**.

Ask an admin for two things on day one

Your **mobile number** — without it click-to-call has nothing to ring and your Call Log is empty. And your **Openhouse SMID** — without it you cannot book visits.

3. The stage machine CHANGED

Ten stages. A lead sits in exactly one, and its stage decides which page shows it.

Lead stage flow

staging branch · every arrow is a real transition in leads.py / visits.py

Stage	Page	What puts a lead here
new	New Leads	Arrival from any source
call_not_received	Call Not Received	A call marked No on a lead nobody has ever reached
follow_up	Call Back Again	A call marked Yes , a saved callback, saved call details, or a No on someone reached before
qualified	Qualified Leads	Confirm & qualify on the lead's form
visit_scheduled	Visited Leads	A real visit booking on the Openhouse app
revisit_scheduled	Pipeline Leads	A second booking, once the first visit is closed off
won	Converted Leads	Only the Status picker
future_prospect	Rejected Leads, badged	Only the Status picker
NEW		
rejected	Rejected Leads	Reject lead (reason + notes), or a call marked Invalid Number

Everything except the Status picker moves forward only

The qualify form, a saved callback and a visit booking never pull a lead backwards, and never move it out of Won, Future Prospect, Rejected or RNR. Re-saving the form on a lead that has already been visited leaves its stage alone. The Status picker is the deliberate exception.

Auto-RNR: 5 misses in a row, or 8 in total

When a lead in Call Not Received, Call Back Again or Qualified is marked **No** for the 5th time in a row — or the 8th time ever — it moves to RNR automatically. A miss below that line never drags a qualified or booked lead backwards. The on-screen message still says “10 missed calls”; that wording is out of date, the real rule is 5 and 8.

The two-hour spam guard

After a **No**, the same lead refuses a second **No** for two hours and says how long is left. A blocked **No** writes nothing — no note, no miss, no history. Calls placed by a dialer campaign are exempt.

4. Sidebar, top bar & notification bell CHANGED

Sidebar

Section · item	Visible to	Notes
Home	Everyone	Summary / Table
New Leads ... Rejected Leads	Everyone	New Leads shows <code>new total</code> ; the others show their share of your leads
Live Calls	RM, Test RM	Shows <code>LIVE</code> on a call, otherwise a count of calls waiting to be marked
WhatsApp	Admins; RMs if switched on	A dot when a new message has arrived
Live Inventory · Supply Pipeline	Everyone	Discovery
Auto Dialer	Admin	Schedule Campaign and Previous Campaigns unfold inside it
Bonvoice Call Log	Everyone	For RMs, a count of incoming calls since you last looked
Huvo Call Log · Meta Leads · Reports · Activity Logs · Settings & Access	Admin	Settings is admin-only in staging
Your name (bottom)	Everyone	Opens Profile. It is no longer a sign-out button.

Visited vs Pipeline — the naming trap

Visited Leads holds leads with one booked visit; **Pipeline Leads** holds leads with a booked *revisit*. Their web addresses are the other way round (`/leads/pipeline` is Visited). Always talk in sidebar labels.

Top bar

The page title, then that page's own buttons (for example **Select**, **Select first 10 / 25**, **Export CSV**), then the notification bell. There is no global search box any more — each list has its own.

Notification bell NEW

Category	What it lists	Clicking a row
New Leads — not yet called	Your leads still in New	Opens the lead
Reminder — callbacks due today	Call Back Again leads due today <i>or already overdue</i>	Opens the lead
WhatsApp — still replyable	Conversations with no lead yet, still inside the 24-hour reply window	Opens the chat
WhatsApp — template only	Conversations with no lead yet, window closed	Opens the chat

WhatsApp categories only appear for people allowed to see WhatsApp. “Reminder” is a stand-in — there is no separate reminders feature, and Call Not Received callbacks are not included.

/ · sidebar **Home** · everyone — numbers are scoped to your own leads if you are an RM

The landing page, in two views switched by the **Summary / Table** toggle at the top right. Your choice is remembered in this browser.

Summary

Summary as an admin — the lead funnel with an RM filter, then trends by day, source and city.

Card · control	What it does
Lead funnel	Bars for All , Qualified , Visit , Revisit , Closed , plus Future Prospect . Each bar is how many leads are in that stage <i>right now</i> — not how many ever passed through. The percentage beside each bar is its true share; the bar lengths are compressed so small stages stay visible.
Other stages (right)	New Leads, Call Not Received, Call Back Again, Rejected. Bars plus this band add up to All.
This week · This month · All time · Custom	Filters the funnel by the day each lead arrived, on the IST calendar. Default All time .
All RMs ADMIN	Narrows the funnel to one RM. Every RM is listed, including those with none.
My performance RM	Six tiles — Total leads, Reached qualification, Call connect rate, Converted, Overdue callbacks, Hot leads — for a range, bucketed by received or assigned date. Admins don't see this card; per-RM numbers for admins live on Reports .

Leads received · 7d / 15d / 30d / All	Daily inflow chart.
By source · By city	Donuts with each group's conversion rate.

Test leads are excluded from every Summary number.

Table — the entire lead book in one list. The coloured boxes count each stage and act as a filter.

Control	What it does
Stage boxes (ALL , NEW LEADS ... REJECTED)	Click to show one stage; click again to clear. Each count respects every other filter, so the boxes always add up to what you are looking at.
City tabs, search, Filters	The shared list toolbar (section 6). Extra filters here: Rejected stage, Reject reason, Rejected on.
Export CSV ADMIN	Every row matching the filters, not just the current page.
Row	Opens the lead popup.

Columns: Lead, Phone, Source, Stage, City, Society, Assigned To, Received. This view is read-only — no assign or notes controls — and unlike Summary it **includes** test leads. The Rejected box also contains RNR and Future Prospect leads.

6. The lead-list toolbar NEW

Every lead list — Home → Table, New Leads, both callback pages and the five stage pages — shares one toolbar and one set of habits. Learn it once.

Control	What it does
All · Gurgaon · Noida · Ghaziabad · Invalid City	City tabs. Invalid City collects leads whose city is blank, a sheet error like <code>#N/A</code> , or anything outside the three — the only way to find those rows at all.
Search box + Search	Searches name, number, email, city, society, configuration, budget, plan, owner, notes and stage. Nothing happens until you press Search or Enter. Clear appears once applied. Three or more digits also match a phone number however it is formatted.
Filters	Opens a modal. Active filters show as chips beside the button, each with an x, plus Clear all . Changes apply as you make them; Done closes.
Shared filters	Society (the master list), Created , Assigned (date ranges), Meta form (arrived through the Meta webhook), Invalid number (not exactly 10 digits), and Assigned RM — which lists every RM including those with zero, so “does Priya have any?” can be answered.
Select (top bar)	Turns on checkboxes. Tick rows to reveal the bulk bar: N selected, Select first 10 / 25, Reassign to..., Unassign, Clear. Reassign and Unassign apply immediately — no confirmation
Export CSV ADMIN	All filtered rows, as a spreadsheet.
Pager	Showing a–b of N , ← Prev , Page n / N (type a number), Next → . 50 rows a page.
Clicking a row	Opens the lead popup. Clicks on a button, link or checkbox inside the row do their own job instead.

Cells you will see in every list

Pink phone button	Click-to-call. Your mobile rings first; greyed out when the lead has no number.
+ Assign / owner name	Assign, reassign or unassign. Admins are not in the list.
NEW starburst	The lead arrived <i>or was assigned to you</i> today (IST). It is not the New stage.
TEST tag	A seeded test lead. These sort to the top.
Notes	Latest note; N notes expands the thread. Read-only here — add notes in the popup.

Search text and the city tab belong to the page you are on and reset when you leave it.

7. New Leads CHANGED

/Leads/new · sidebar **New Leads** · everyone

Leads that have arrived but have not been worked yet. Most of an RM's day starts here.

Vihaan Agarwal		+91 98156 18827	99acres	Ghaziabad	Gaur Cascades	Up to ₹75 lacs	3-6 months	08 Sept 2026

New Leads with the shared toolbar. There is no Connected? column in staging.

Control	What it does	Who
Sync now	Pulls the Google Sheets immediately. Toast: <i>Synced · N new leads.</i>	ADMIN
Source filter	Meta, 99acres, MagicBricks, WhatsApp, Huvo.	everyone
Plan filter	Only appears when Source is Meta, because “plan to buy” is a Meta form question.	everyone
Received filter	Today, Yesterday, This week, This month, or a custom range.	everyone
Everything else	The shared toolbar — section 6.	everyone

Columns: Lead, Phone, Source, City, Society (from source), Budget, Plan to Buy (colour-ramped from *Within 30 days* down to *Just exploring*), Created On, Assigned To, Notes.

Where did Connected? Yes / No go?

On main, every row here asked **Connected?**. In staging that column is gone from all worklists. Mark a call result on **Live Calls** during a campaign, or open the lead and save a follow-up or the qualify form.

8. Call Not Received & Call Back Again CHANGED

/leads/call-not-received · /leads/followup · everyone

One design, split by a single question: **have we ever reached this person?** Call Not Received holds leads we have dialled but never reached. Call Back Again holds leads we have spoken to and owe a callback.

Call Back Again. Row colour is the priority signal; the red chip means overdue.

Row colour	Meaning	Order
green	Moved onto this page today	First
blue	Callback due today	Second
plain, red time chip	Overdue — most recently missed first	Third
plain	Due later — soonest first	Last

Clicking any column header replaces this ordering.

Column · control	Meaning
Follow-up due	The callback time, with · 2h late when overdue or · in 40m when close.
Misses	Missed calls in a row. Turns red at 5 — the auto-RNR threshold. A second, lifetime counter is never shown and triggers RNR at 8, so a lead can leave while this column reads 2.
Due filter	Filters on the callback time instead of the arrival date.

9. Qualified · Visited · Pipeline · Converted · Rejected

CHANGED

Five sidebar entries, one page design · everyone

Everything after qualification. Each page adds or drops a column or two to fit its stage.

Rejected Leads — also home to RNR and Future Prospect, each badged.

Book Visit only opens the planner.

Saving a plan is internal preparation and does not change the stage. Only booking on the Openhouse app — the last step of the planner — moves a lead to Visited.

10. The lead popup NEW

Opens from any lead row or lead link · `/leads/<id>` still opens the full page (new tab, ⌘-click, pasted link)

The single-lead workspace. Close it with X, a click outside, or Escape. Only one lead is open at a time.

Top of the popup for a portal lead: header, Status and follow-up, then the editable source data beside the conversation thread.

Header

Name, city and stage chips, + Assign / owner, and Plan visits. Underneath: phone · source · society · configuration · budget.

Status NEW

A dropdown of all ten stages that saves the moment you change it

No button, no confirmation, and available to every role on every lead. It can move a lead backwards. It changes *only* the stage: picking Rejected records no reason, and picking Visit Scheduled creates no visit. The move is written to Lead history. This is the only way to set **Won** or **Future Prospect**.

Schedule a follow-up

Shows **Currently set**: when a callback exists. The date field **always opens blank** on purpose — that does not mean nothing is set. **Save & move** → stores the time, marks the lead as reached, and moves it to Call Back Again unless it is already Qualified or further. It then takes you to the Call Back Again list either way. A typed time is never pushed into calling hours.

From the Meta form — or — Lead data captured from the source

From the Meta form **NEW**

Shown for Meta leads that came through the webhook. Every question the ad asked, with the answer exactly as Meta sent it, the campaign and ad in brackets, and *newest of N submissions* if the buyer filled the form more than once. Read-only.

Lead data captured from ...

Everyone else. **Edit** makes Budget, City, Society of interest, Plan to Buy and Source remarks editable; **Save** records each changed field in history.

Q4. Size sq.ft

1400

2100

₹60-100L • shows to ₹110L

Q5. Micro-markets — suggests localities + societies

Golf Course Ext X Dwarka Expressway X

A Meta lead: the form card lists every question the ad asked, with the campaign and ad it came from.

Webhook Meta leads get the form card instead of the editable one, so their source fields cannot be edited from the popup.

Conversation & remarks

Imported remarks first, then the team's notes, oldest first. Type and press **Enter** or **Send**. Notes cannot be edited or deleted.

Further down: the qualify form, the save and reject buttons, and Lead history.

Lead data confirmed on call

Question	Field
Q1 Purpose *	Self-use or Investment
Q2 Configuration *	2 BHK → 4 BHK
Q3 Budget *	Minimum and maximum in lacs; max must not be below min
Q4 Size	Square-foot range
Q5–Q7 Micro-markets → localities → societies	Each level suggests the next as + chips; nothing is picked for you
Q8 Willing to come to office? *	Yes / No / Maybe — Yes or Maybe asks for a preferred date

Button	Effect
Confirm & qualify (Update & qualify once confirmed)	Needs the starred fields and a follow-up time. Moves the lead to Qualified unless it is already there or further.
Save details & set follow-up	Needs the same. Saves without qualifying and moves the lead to Call Back Again, then opens that list. Not written to history.
Save (leads with a visit)	Saves the answers only; no follow-up needed and the stage stays put.
Reject lead	Opens a box with two reasons — Requirement Mismatch or No Requirement — and mandatory notes. Rejecting overrides any stage.

Lead history NEW

Every logged event on this lead, newest first, each as one sentence with who did it: created, Meta form submitted, assigned, calls, notes, stage changes and the reason, starred.

Right-hand cards

Planned site visits	The saved route. Visit not scheduled yet means it is only a plan. ↗ Maps , Edit plan .
Call activity	Every phone call, with a player for its recording.
Huvo calls	What the AI bot got out of the buyer, with score and summary.

Planning and booking a visit

1. **Plan visits** opens the planner: trip date, the lead's RM, and the **RM accompanying** (only people with an SMID). Add units from live inventory, reorder, **Optimize route**.
2. **Save visit plan** stores the plan. **Nothing is booked and the stage does not change**.
3. **Book N visits on Openhouse app** opens the booking drawer: pick a date and time slot, confirm buyer details, then **Review**.
4. **Confirm & book N** creates real appointments. **They cannot be edited or undone**, and the buyer is notified immediately. The first booking moves the lead to Visited; a later one to Pipeline.

Booking is refused while a visit is still upcoming

A lead with a visit not yet marked complete cannot book another. Visit status updates from the ops sheet, not from this app.
Also: **Fix & rebook** after a partial failure resends *every* unit, so the ones that succeeded now trigger this refusal.

Escape closes the whole popup

With the Reject box, the planner or the booking drawer open on top, Escape closes the lead popup underneath as well. Use their own X instead.

11. Live Calls CHANGED

/live-calls · sidebar (it was in the top bar on main) · RM TEST RM only

The RM's screen during an auto-dialer campaign. The system rings your handset first and bridges the buyer second, so this page tells you who is on the line, who is next, and which finished calls still need a result. It never interrupts: finished calls wait quietly.

Live Calls as an RM mid-campaign. The corner pill reads *live* when updates are streaming, *polling* when they are not.

Section · control	What it does
Header	The campaign dialling you and its calling window, or <i>No campaign is dialling you right now.</i>
Now calling · Open lead	The buyer on the line — name, number, society, stage, and whether anyone has reached them before. Opens the lead popup.
Up next	The queue. <i>Shared pool — these may go to another RM</i> unless the campaign assigns leads to their owners.
Today · N calls	Today's finished calls. Unmarked ones carry needs result .
Connected? → Yes	Marks the call connected, moves a New or Call Not Received lead to Call Back Again, and opens the lead.
Connected? → No	Asks why: Did Not Pick / Not Reachable (callback in 3h), Switched Off (6h) or Invalid Number (to Rejected). Notes optional. The two-hour spam guard does not apply to campaign calls.

Mark before midnight

Today resets at midnight IST, and yesterday's unmarked calls drop off this page. Your Yes / No also does not change whether the dialer retries a lead — retries follow what the phone system recorded.

Admins do not get this page, and a campaign refuses admins in its RM pool. If someone is promoted to admin during a running campaign, their phone keeps ringing with no page to mark results.

SAME

[/dialer/schedule](#) · [/dialer/previous](#) · sidebar **Auto Dialer** · **ADMIN** only — RMs see “The auto dialer is admin-only”

Build a calling campaign — rules that pick leads, RMs who do the calling, and a pace — then monitor it. It runs on the server: **closing the tab stops nothing**. Only cosmetic changes from main.

Schedule Campaign

35

Name this campaign...76 leads matched

Start dialing

STEP 1

Who gets called

76 leads

ANDORmatch all of

+ Condition+ Group

Lead stageINcall_not_receivedfollow_upfuture_prospectnewqualifiedrejectedrevisit_scheduledrmrvisit_scheduledwonX

Leads with no phone number, and test rows, are never dialled whatever the rules say.

STEP 2

Who calls them

Assigned Leads
Each lead is called by the RM it's already assigned to

Round-robin
Longest-idle RM takes the next lead

Least load
Whoever has made the fewest calls so far

D Dheeraj Kumar
dheeraj@openhouse.in

P Priya Nair
priya@openhouse.in

R Rohan Verma
rohan@openhouse.in

T Test RM TEST
test.rm@openhouse.in

No RMs selected — that's 0 calls at a time, one per handset. Their phone rings first; the lead is only dialled once they pick up. Each RM only calls their own leads, so a matched lead assigned to nobody here is dropped when the campaign starts.

STEP 3

Pacing

Gap between calls (seconds)10

Calling window (IST)10:00 AM07:00 PM

Max attempts / lead1

Cooldown before a retry (minutes)180

0 = the next lead rings the moment the last call ends

Retries only leads that never connected

Three steps: who gets called, who calls them, and how fast.

Step · control	What it does
Name · N leads matched	The count updates as rules change. Under “Assigned Leads” it becomes N leads to call .
1 · Who gets called	+ Condition and + Group with AND / OR. Fields: Society, City, Lead source, Lead stage, Assigned to, Created date, Missed calls, Ever connected. An empty group matches <i>everyone</i> . Leads with no number and test leads are never dialled.
2 · Who calls them	Assigned Leads (each lead's own RM), Round-robin (longest idle) or Least load . Pick RMs; TEST marks a test account and RMs with no mobile are greyed out. One RM means one call at a time.
3 · Pacing	Gap between calls, calling window (IST, cannot cross midnight), max attempts per lead (retries only never-connected leads), cooldown before a retry.
Start dialing	Queues the leads and starts ringing at once. No confirmation Refused if the window has already ended today, or if an RM is already in another live campaign at overlapping hours.

Calls are matched to you by your mobile number. With no number on your user record, you see nothing. Each bridged call also appears as two rows — one per leg.

Huvo Call Log

Calls made by Huvo's AI bot: outcome, interest, score and a written summary. Many are to numbers with no lead yet, and turning those into leads is this page's main job.

Bot calls. + Create lead appears on any call whose number has no lead.

Control	What it does
Filters	Campaign (including <i>No campaign</i>), Outcome, Interested, Lead (<i>Has a lead / No lead yet</i>), Duration. Search covers the summary text too.
+ Create lead	Name, city, society; the number is locked. Links every call from that number to the lead.
Create leads (N)	Bulk mode — tick rows, or tick none to convert every unlinked call matching the filters. Leads are created unassigned . No confirmation
Row	Full detail: what they want, budget, scheduling, summary, recording, raw data.

Outcome colours: green = good (qualified, visit or meeting scheduled), red = dead (not interested, wrong number...), amber = worth retrying.

Bulk create ignores the Campaign filter

when nothing is ticked — it can create more leads than the button's count promised. Tick the rows you mean when a campaign is selected.

14. WhatsApp CHANGED

/chat · sidebar · admins always; an RM only if an admin has switched it on for them

The shared inbox for the Openhouse business number. Read and reply, tag what the number turned out to be, and convert genuine buyers into leads. Admins also decide who owns each conversation.

Threads on the left, the conversation on the right. Background colour is the tag; an amber left bar means a lead already exists.

New conversations arrive UNASSIGNED — and only admins can see them

An RM only sees conversations assigned to them. Nothing hands a new chat to anyone automatically, so if no admin is watching the inbox, new customers wait. Assign through the owner dropdown, or convert the chat to a lead with *Assign designated RM*.

Control	What it does	Who
Thread row	Opens the conversation. Red = tagged rejected, blue = any other tag, amber = has a lead.	everyone
Owner dropdown	Assigns or unassigns the conversation. Recorded in history.	ADMIN
Mark read → broker / buyer / seller / rejected	Tags the contact. <i>Rejected</i> also clears its owner. Any other tag on an unowned thread assigns it automatically as a side effect.	ADMIN
Assign unowned	Gives every unowned, non-rejected conversation an owner in one go.	ADMIN
+ Create new lead	Name pre-filled from their WhatsApp profile, number locked, optional city and society, and <i>Keep RM unassigned</i> (default) or <i>Assign designated RM</i> .	own threads

Create leads (N)	Bulk conversion with Select first 10 / 25 and the same owner choice.	own threads
View lead	Opens the lead popup when one already exists.	everyone
Message box · Send	Enter sends, Shift+Enter adds a line.	own threads

The 24-hour window

WhatsApp only allows a normal reply within 24 hours of the customer's last message. After that the box is replaced by a notice, and only an approved template can reach them. A business can never start a conversation — the customer must message first.

Unassigned is the safer default when creating a lead: an unowned lead sits in the pool where the next person picks it up, while one owned by the wrong RM is invisible to everyone else. Who gets picked: the RM who already owns a lead for that number, else the active RM with the fewest open conversations. Test RMs are never picked.

15. Meta Leads

CHANGED

/meta-leads · sidebar · ADMIN only

A record of every lead Meta has delivered and what happened to it. This is the **delivery log**, not a lead list: a failed row is a buyer who filled in the form and is **not in the CRM** — and this page is the only place that gap shows.

Filters, the share buttons, then units grouped by city and micro-market.

Control	What it does
Search box NEW	Filters by society, locality, configuration or status. This page has its own box now that the top-bar search is gone.
City · BHK / Config · Region · Status	Multi-select filters, remembered in this browser. Status defaults to what can be sold.
Price (₹ Cr)	In crores here. Units without a price drop out once a bound is set.
Reset filters	Clears filters and the search box.
Share filtered selection · As image city buttons	A PNG poster: Copy image , Download PNG , or Open WhatsApp (downloads it first — attach it in the chat).
As text city buttons	An editable text block: Copy to clipboard or Share via WhatsApp .
Sync now	Re-reads the inventory sheet. Any role can press it.

A **NEW** badge here means *Coming Soon* — not yet available. The status shown is the live availability from the supply system, not what the sheet says.

Supply Pipeline

/supply · everyone · desktop only · admins see prices

Units still being onboarded, closest to landing first. Check here before promising a buyer something in a society with nothing live.

Supply Pipeline

Supply pipeline not available

Set PROPERTIES_DATABASE_URL

Empty here on purpose: this page reads the supply team's database live, and the sample environment used for these screenshots is not connected to it. In the real app it lists pipeline units with their stage; UID and OH Price are admin-only columns.

Search · City · Config	Filters, for everyone.
Budget (₹ L) ADMIN	In lakhs here, on the Openhouse reference price.
OH Price ADMIN	Green = confidently matched. Gold Check Price with a reason (<i>no match, no area, area off</i>) = verify before quoting.
Tower / Unit	Unit numbers are shown to admins only.

17. Reports

SAME

/reports · sidebar · ADMIN — an RM who opens the address sees only their own row

One row per RM, one column per activity, for a date range. Every number is counted from the activity log — what people did and when — so an RM who did nothing still appears, as zeroes. That blank row is usually what a manager is looking for.

Days with no logged activity have no row — the summary table on [Reports](#) is where an idle RM shows up.

One RM, one card per day. Click a day to list the leads behind its numbers.

Each day shows first and last activity, leads touched and actions taken. A day's lead list shows the stage journey that day and **Now** — the lead's stage today, which says *same* when the change stuck. Both views have **Export CSV**. An RM opening someone else's drill-down link sees their own data instead.

18. Activity Logs

CHANGED

/ Logs · sidebar · ADMIN only

What changed, who changed it, and from what to what — the place to answer “who moved this lead to rejected, and why?” Each entry reads as a sentence, the same sentences as a lead's own history card.

Privacy

Applies to everyone, not just you.

Hide lead phone numbers in tables

Keeps numbers off New Leads, Call Not Received, Call Back Again and the segment lists — for shared screens, screenshots and demos. Calling, WhatsApp and the lead detail page are unaffected.

☐

WhatsApp access

Who sees the WhatsApp button in the top bar. Admins always see it.

Show WhatsApp to all RMs

☐

Users, their role, how many leads each maps to, and the two org-wide switches.

Users & access

Control	What it does
+ Add user	Google email, full name, role, Openhouse SMID (to book visits) and mobile (rings first on click-to-call). Only people added here can sign in.
Role dropdown	Changes the role at once, with no confirmation . Recorded with the previous role.
Active switch	Disables the account within about 30 seconds. If they still own leads, you are asked to reassign them first.
Edit · Remove	Name, role, SMID, mobile. Remove asks for confirmation and offers to reassign their leads.
🕒 Force logout all	Ends every session, yours included, after a confirmation.

Each row shows how many leads the person maps to and which name they are matched by — the fastest way to diagnose “this RM sees no leads”.

Three things this page does not protect you from

Reassigning a leaver's leads matches on first name as well, so a colleague with the same first name can lose leads too. Nothing stops an admin demoting or disabling themselves. And there is no control for an RM's covered cities, which the hourly auto-assignment reads.

Privacy

Hide lead phone numbers in tables — for shared screens and demos. Numbers disappear from the lists, but calling, WhatsApp and the lead popup keep working. Toggling it reloads the app. (The mobile app does not honour it.)

WhatsApp access

Show WhatsApp to all RMs, or tick individuals. Admins always have access. This only controls whether the WhatsApp link shows — what each RM can read is still decided by which conversations are assigned to them. The on-screen help still says “top bar”; the link is in the sidebar now.

20. Profile & dark mode NEW

/profile · click your name at the bottom of the sidebar · everyone

Profile: appearance, role, email and sign out.

Home as an RM — a personal funnel and My performance tiles, no RM filter.

Appearance	Light or Dark, remembered in this browser.
Role · Email	Read-only. Roles are set by an admin in Settings.
Sign out	Ends the session in this browser only. It does not sign you out elsewhere — an admin's Force logout all does that.

21. The mobile app CHANGED

Same address, a separate layout below 768px wide

A cut-down app for calling on the move. Pages it does not carry return you to Home.

> Home

Where do you currently live

gurgaon

Zip code

201301

The full lead page, one column

On mobile	Detail
Included	Home, the lead lists, the lead page, Live Inventory, Profile
Not included	Live Calls, WhatsApp, call logs, dialer, Meta Leads, Supply, Reports, Logs, Settings — and the Pipeline Leads list
Labels differ	Call Back Again is Follow Up; the list desktop calls Visited Leads is labelled Pipeline Leads
Behaviour	Leads open as a full page, not a popup; no visit planner; phone numbers always show; signing out asks “Do you want to Log Out?”

22. Traps, and known rough edges in staging

Traps that cost people time

What you'll hear	What is going on
"The app is empty for me"	Blank or mismatched name on the user record. Leads are matched by name — check the row in Settings.
"Where is Connected? Yes / No?"	Removed from the worklists in staging. It lives on Live Calls; otherwise save a follow-up or the qualify form in the popup.
"Visited or Pipeline?"	Visited = one booked visit. Pipeline = a booked revisit. The web addresses — and the mobile labels — are swapped. Use desktop sidebar labels.
"My callback disappeared"	The follow-up field always opens blank. The saved time is the Currently set: line.
"I saved the plan but nothing booked"	A plan is prep. Only Confirm & book in the booking drawer books.
"Search isn't working"	It applies on Search or Enter , not as you type.
"It says 10 missed calls"	Out-of-date wording. The rule is 5 in a row or 8 in total.
"How do I mark a lead Won?"	Only with the Status picker in the popup.
"Nobody replies to our WhatsApps"	New conversations are unassigned and admin-only until someone assigns them.
"My Call Log is empty" · "I can't book"	No mobile number · no SMID on your user record.
"The city I fixed reverted"	The source sheet rewrites city on each sync. Fix it in the sheet.
Prices in two units	Live Inventory filters in crores; Supply Pipeline in lakhs.
No undo	Status picker, bulk reassign, role changes, campaign Start and Stop , bulk lead creation, visit booking.

Known rough edges

Found while documenting staging. **Verified** means reproduced against the running staging code; the rest are read from the code and not yet reproduced.

Issue	Effect	Status
WhatsApp inbox for a user with no conversations	The inbox request returns a server error instead of an empty inbox. Hits every Test RM, and any RM with no conversations assigned.	Verified
Status picker is unguarded	Any role can set any stage on any lead, backwards included, with no reason.	Code
RM scoping stops at the lists	An RM with a lead's link can open and change it.	Code
Escape inside Reject / planner / booking	Closes the whole lead popup.	Code
Fix & rebook	Resends units that already booked, which are then refused.	Code
Huvo bulk create with no rows ticked	Ignores the Campaign filter.	Code
Bonvoice Call Log dates	Only control Sync, not the table.	Code
Mark read for RMs on WhatsApp	The button shows but the action is refused.	Code

No screen for an RM's covered cities	City routing in the hourly auto-assignment cannot be used yet.	Code
Stale on-screen text	"10 missed calls"; WhatsApp access help says "top bar".	Code

Two habits worth forming in week one

Mark every call you take on Live Calls — Reports counts what you marked, not what the phone system saw. And open the bell first thing: New Leads and Reminder are the two lists that only get worse if ignored.
